ATHARVA SHEWALE

Unreal Engine 5 Developer — Interactive & Architectural Visualisation

Goa, India | +91 7041142749 | shatharva@gmail.com | linkedin.com/in/atharva-shewale-3835b0250 | Showreel: [ADD YOUTUBE URL]

SUMMARY

Unreal Engine 5 developer specialising in real-time interactive visualisation — ArchViz, VR/AR walkthroughs and simulation — delivered across PC, touchscreen, Meta Quest and cloud deployment. Delivered a **INR 1.8 lakh** Unreal ArchViz project end to end as sole developer, and currently building a real-time naval simulator in C++ and Blueprints for Naval Academy training. Comfortable owning both sides of the pipeline: lighting, texturing and level dressing, plus the Blueprint and UMG systems that drive them.

WORK EXPERIENCE

Freelance UE5 Developer — Gaming & ArchViz

Self-employed | Apr 2025 – Present

– Delivered a **INR 1.8 lakh** Unreal Engine ArchViz project end to end as sole developer — scoping, implementation, optimisation and final deployment.
– Built interactive 3D environments for PC, touchscreen kiosks, VR and AR with modular Blueprint systems and reusable UMG interfaces, optimised to hold target frame rate on desktop and mobile-class hardware.

Game Developer — eDot Solutions

Goa, India | Full-time | Aug 2025 – Present

– Building a real-time naval simulator in UE5 with C++ and Blueprints, deployed to both cloud and local machines with physical hardware input rigs.
– Developed AI-controlled ships with autonomous decision-making, procedurally generated scenarios, advanced physics and dynamic real-time lighting for authentic training conditions.
– Dual-purpose product serving Naval Academy training and a public gaming release; live demo at colregs.ai.

UE5 Artist & Developer (Intern) — Saridena Constructions

Hyderabad, India | Oct 2024 – Apr 2025

– Built VR/AR/XR walkthroughs, interactives, renders and cinematics for real-estate projects using Blueprints and UMG, including multiplayer walkthrough sessions.
– Handled level design, lighting and texturing for Meta Quest 2 and Android AR builds.

UE5 Gameplay Programmer (Lead) — Frequency Zero

Collaborative indie project | Oct 2025 – Present

– Lead gameplay programming for a first-person atmospheric horror shooter, owning core player mechanics, combat and interaction systems across a collaborative team.
– Built the player ability set in Blueprints — EMP-based perception, Dash, and a Purge charge mechanic with cooldown states, resource metering and UMG feedback.
– Implemented enemy encounter and combat logic on reusable, modular Blueprint systems supporting a fast-paced survival loop.
– Shipped a playable Windows prototype to itch.io (gamersaurusrex.itch.io/frequency-zero); planned for showcase at IGDC 2026, Chennai.

Freelance 3D Artist & Motion Designer

Self-employed | May 2021 – Mar 2025

– 3D models and animation for an animated film, character/environment/prop artwork for television commercials, and game-ready visuals for a mobile title; motion graphics and social campaign content in Adobe Creative Suite.

SKILLS

Visualisation: Unreal Engine 5, ArchViz, real-time lighting, texturing, level design, cinematics, Metahumans, VR/AR/XR walkthroughs, performance optimisation

Interactivity: Blueprints, UMG / UI-UX, modular interaction systems, multiplayer walkthroughs, touchscreen and kiosk builds

Programming: C++ (gameplay and simulation, alongside Blueprints), Blueprint visual scripting, Android Studio

Platforms & tools: Windows PC, Android, Meta Quest 2, AR, cloud-streamed deployment; Git, Perforce, Adobe Creative Suite

EDUCATION & CERTIFICATIONS

Bachelor of Arts (Hons), VFX & Animation — Annapurna College of Film and Media, Hyderabad | 2022 – 2025

Diploma, Arena Certified Professional in VFX Compositing & Editing — Arena Animation, Vadodara | 2021 – 2023

Epic Games Game Design Professional Certificate — Coursera, Feb 2025. Eight-course series in world-building, level design, Blueprint scripting and UI/UX.
